

Dear Sirs:

We are concerned about the possible erosion of the liberty of free speech associated with MB Docket No. 04-233. We are sure you will receive many comments regarding free speech issues and we wholeheartedly agree that restriction or dilution of mission-focused radio programming, such as but not limited to Christian radio, would be a mistake.

It appears to us that another fundamental issue that is missing, at least from a brief reading of the first part of MB Docket No. 04-233, is that of free enterprise. How can anyone claim certain broadcasters are ignoring their local constituencies? If they ignored their constituencies, they would go out of business. On the other hand, if MB Docket No. 04-233 is a way for special interest groups such as homosexual advocates to propagate their message at someone else's expense under the guise of "diversity," we are adamantly opposed to such measures.

Please, we need less regulation in America, not more. We urge you to stop MB Docket No. 04-233.

Sincerely,

Dean and Lynette Steele
